

## **ScienceLogic to Provide Advanced IT Infrastructure Monitoring at Department of Health and Human Services**

### ***Prime contractor Unisys cites proactive Blackberry and Exchange management and continuity of operations as reasons for selection***

**CHANTILLY, VA, August 22, 2006** – ScienceLogic™ LLC, a leading provider of next-generation frameworks technology, today announced that Unisys Corp. (NYSE: UIS) has chosen the EM7™ IT Management Appliance to provide advanced infrastructure monitoring for the Department of Health and Human Services (HHS).

Unisys designed and delivered a consolidated HHS enterprise email solution that is intended to support 72,000 users across eight HHS operating divisions by providing managed services including desktop support, server support, service desk, server consolidation, continuity of operations/disaster recovery, training, application and server hosting, security operations, system and network monitoring and database and application administration.

Deploying a high-availability version of the EM7 appliance allows Unisys to add key capabilities to its broad-based support of HHS operations. New capabilities include:

- Proactive application management for
  - o RIM Blackberry
  - o Microsoft Exchange
  - o Tumbleweed MailGate
  - o Microsoft Cluster Server
- Detailed performance and availability statistics for hardware, including Unisys ES7000 and Dell servers
- Automated reporting for SLA, historical and trending analysis
- Redundant systems monitoring providing a single cost-effective operations continuity solution for the geographically dispersed HHS data centers

“The EM7 appliance delivers the right level of integrated monitoring and actionable insight in an appliance that can be integrated and deployed to provide timely enterprise class services to our customers,” said John O’Neill, vice president, Enterprise Computing and Network Services, Unisys. “It is also the right solution to cost effectively provide the level of operations continuity

we need – enabling us to deploy the right solution for our customer within weeks instead of months. This selection reflects our commitment to evaluate and utilize the best technology solutions in the marketplace which, in turn, enables us to continually raise the bar when it comes to the level of service we provide to our customers.”

David Link, CEO and president of ScienceLogic, added, “We are very pleased to have been selected by Unisys - a clear leader in the federal contractor space. It is a strong validation of our mission to provide solutions that combine innovation with IT management best practices – helping our customers deliver impeccable service to their customers.”

### **About ScienceLogic**

Chantilly-VA based ScienceLogic LLC was founded in 2003 with one goal: Simplify IT. Founded and staffed by technology professionals who are intensely focused on making IT management simpler, better and faster, ScienceLogic is committed to delivering solutions with unquestionable quality and value and enabling its customers to deliver impeccable service to their constituents. ScienceLogic’s patent-pending EM7 IT Management Appliance is a next-generation “framework” solution engineered to deliver comprehensive systems management through a set of applications, tools, reporting and a centralized data repository – pre-integrated and optimized to work together as a secure and cost-effective appliance.
